

Sample request card acceptance criteria 'data set'

To ensure adequate identification of samples processed by Clinical Immunology, each sample **AND** request card must have a minimum of two matched identifiers. These identifiers **MUST** include a minimum of one from **EACH** of the following lists (one from A and one from B):

List A:

- Full name = Surname name and first name. (i.e. SMITH and JOHN)
- Special clinic number e.g. M69457
- Medical trial unique identifier

LIST B:

- NHS number
- Local hospital number
- Date of birth
- Referral laboratory number

If the sample match is less than the minimum above the sample will not be tested.
