

Dear [REDACTED]

I am writing to respond to your request sent on the 25th April 2016. Oxford University Hospitals NHS Foundation Trust can confirm that it holds the data, but unable to provide in the format requested. The Trust can determine the number of referrals that we have had for BRCA1/2 analysis, however the vast majority of these are Breast cancer referrals.

I am grateful that you called to discuss the request and based on our discussion we have agreed that the Trust at this point will not be able to distinguish ovarian cancer without interrogating individual files and exceeding the cost limit of £450.

Please do not hesitate to contact me on the email below concerning this request.

Please note that on 1 November 2011 the Oxford Radcliffe Hospitals NHS Trust (ORH) merged with the Nuffield Orthopaedic Hospital NHS Trust (NOC) to form the Oxford University Hospitals NHS Trust (OUH). Our response reflects these changes. Therefore, we consider that Oxford University Hospitals Trust has released to you all of the information that it holds in relation to your request.

Provision of this information does not constitute permission for its commercial re-use in terms of the Re-Use of Public Sector Information Regulations 2005. You are free to use the information for your own use, including for non-commercial research purposes. The information may also be used for the purposes of news reporting. However, any other type of re-use will require permission from the Oxford University Hospitals NHS Trust.

Yours sincerely,

[REDACTED]
