

Dear

I am writing to respond to your request sent on the 15th November 2016. OUH can confirm that it holds the data that you requested.

The Trust has implemented a GPO based Windows screensaver/lock after 15 minutes of inactivity on all Active Directory machines, apart from those within Theatres who are exempt (operation for 10yrs).

The Trust also uses Imprivata OneSign Walk-Away Security ('fade to black') inactivity screensaver in our virtual clinical desktop (commences after 1 minute) and (disconnects inactive users after a further 13mins) – across specialities (operation since 2011).

Yours sincerely,
