

6710 A&E Mental Health Attendances 2016 by Age and Symptom

Request & Response

In order to best provide the information, I have broken down each part mental ill-health category by month, hospital site, and whether the patient's age is under 18, or 18 and above.

In order to comply with our obligations under the Data Protection Act we have redacted numbers to "<5" where numbers in a particular patient group are less than 5. This is to reduce the possibility of any individual being identifiable from this information or by combining it with information that may already be in the public domain.

How many attendances have there been at A&E by people suffering with mental health related issues (for example, categories including, psychiatric conditions, social problems, self-harm) throughout 2016.

Please then give the breakdown for 18 and over, and under 18s and state how many people waited longer than the four hour waiting target.

There were no breaches of the four hour wait to be seen in these cases. Please find the breakdown below.

Date/Site/AgeGroup	Sum of Psych	Sum of Overdose	Sum of Legal High	Sum of Suicide?	Sum of Self Harm	Sum of Mental Health
