

Request

Could you add to this request detail of the number of deliveries/labouring mothers transferred from the Spires unit to the main consultant led maternity department at the JR on each of those three days, and also any transfers from midwife units at Banbury, Wantage and Chipping Norton.

Response

In order to comply with our obligations under the Data Protection Act we have redacted numbers to "<5" where numbers in a particular patient group are less than 5. This is to reduce the possibility of any individual being identifiable from this information or by combining it with information that may already be in the public domain.

The number of labouring mothers transferred from the Spires, Banbury, Wantage and Chipping Norton Maternity Led Units on October 20, 21 and 22 to the JR Maternity Unit.

Table 1 illustrates the number of patients admitted with admission method 'Maternity-Ante Partum' in the requested locations who then subsequently delivered at the JR (not Spires Birth Centre).

	20-Oct	21-Oct	22-Oct
