

Agreed OUH NHS FT Commissioning for Quality and Innovation (CQUIN) goals for 2016/17

CQUIN Name	CQUIN type	Goal
1a. NHS Staff Health and Wellbeing	National	Implementation of a plan to introduce physical activity schemes for staff, to improve access to physiotherapy services for staff and to introduce mental health initiatives for staff.
1b. NHS Staff Health & Well-being	National	Healthy food: Submission of a data return regarding contracts with franchise holders for food and drink suppliers during the year and the delivery of four specific step changes in the healthy food supplied.
1c. NHS Staff Health & Well-being	National	Improving the uptake of flu vaccinations for front line staff within Providers.
2a. Sepsis	National	Timely identification and treatment for sepsis in emergency departments.
2b. Sepsis	National	Timely identification and treatment for sepsis in acute inpatient settings.
4a. Reduction in antibiotic consumption per 1,000 admissions	National	Reduction of 1% or more against the baseline in total antibiotic consumption, Carbapenem use and Piperacillin-Tazobactam use.
Human Factors training	Local	To improve competencies in safer workplace behaviours and quality improvement science for all healthcare professionals in the OUH.
5. Emergency Department (ED) and Ambulatory Care Pathways	Local	To select a cohort of 'ambulant' (i.e. not extremely frail) patients in whom further risk stratification is required; but not necessarily an acute admission. These patients can be seen in an Ambulatory Care area – be assessed and potentially started on treatment but then discharged to be managed safely in the community. This improves the patient journey as well as reducing acute hospital admissions.
7. End of Life Care	Local	To ensure that the possibility that a person may die within the coming days and hours is recognised and communicated clearly, that decisions about care are made in accordance with the person's needs and wishes, and that these are reviewed and revised regularly by doctors and nurses. Care should be tailored to the individual and delivered with compassion – with an individual care plan in place.
B11 Hepatitis C Virus (HCV) Improving Treatment Pathways through Operational Delivery Networks (ODNs)	Specialised Commissioning	NHS England has implemented the establishment of Hepatitis C networks to ensure clinical and cost effective care is delivered with oversight from Hepatitis C centres and multi-disciplinary teams (MDTs). Strong partnership working across the complex pathways for patients is essential to ensure patients have access to both clinical expertise and local delivery of care.
B13 Automated Exchange Transfusion for Sickle Cell Care	Specialised Commissioning	Patients with sickle cell disease require exchange transfusions to manage their condition. This can be done manually or using automated exchange. This CQUIN scheme aims to incentivise the use of automated exchange by specified specialist centres in order to improve patient experience and use of clinical

CQUIN Name	CQUIN type	Goal
		resources.
B14 Haemoglobinopathy Improving Networks through ODNs	Specialised Commissioning	To improve appropriate and cost-effective access to appropriate treatment for haemoglobinopathy patients by developing operational delivery networks (ODNs) and ensuring compliance with ODN guidance through MDT review of individual patients' notes.
CA2 SACT Dose Banding	Specialised Commissioning	A national incentive to standardise the doses of Standardised Dose Banding Adult Intravenous Systemic Anticancer Therapy (SACT) in all units across England in order to increase safety, to increase efficiency and to support the parity of care across all NHS providers of SACT in England.
IM3 Rheumatic Diseases	Specialised Commissioning	Systemic auto-immune rheumatic diseases are rare, multisystem, non-genetic conditions that have high morbidity and mortality. This CQUIN promotes the development of coordinated MDT clinics which will support earlier diagnosis and intervention, and ensure earlier detection/prevention of relapse which will reduce avoidable mortality and morbidity, reduce costs, and improve quality of life.
Haemophilia Partnership Working with DGHs	Specialised Commissioning	To promote Haemophilia Partnership Working with District General Hospitals.
Armed Forces Health	Specialised Commissioning	To ensure high quality services are accessible to armed forces personnel and registered families to promote, protect and restore the health of the community.

Agreed OUH NHS FT Commissioning for Quality and Innovation (CQUIN) goals for 2017/18

CQUIN Name	CQUIN type	Goal
B11: Hepatitis C Virus (HCV) Improving Treatment Pathways through Operational Delivery Networks (ODNs)	Specialised Commissioning	NHS England has implemented the establishment of Hepatitis C networks to ensure clinical and cost effective care is delivered with oversight from Hepatitis C centres and multi-disciplinary teams (MDTs). Strong partnership working across the complex pathways for patients is essential to ensure patients have access to both clinical expertise and local delivery of care.
B13: Automated Exchange Transfusion for Sickle Cell Disease Patients	Specialised Commissioning	Patients with sickle cell disease require exchange transfusions to manage their condition. This can be done manually or using automated exchange. This CQUIN scheme aims to incentivise the use of automated exchange by specified specialist centres in order to improve patient experience and use of clinical resources.
B14: Haemoglobinopathy Improving Pathways through Operational Delivery	Specialised Commissioning	To improve appropriate and cost-effective access to appropriate treatment for haemoglobinopathy patients by developing operational delivery networks (ODNs) and ensuring

Networks		compliance with ODN guidance through MDT review of individual patients' notes.
CA2: Nationally Standardised Dose Banding Adult Intravenous SACT	Specialised Commissioning	A national incentive to standardise the doses of Standardised Dose Banding Adult Intravenous Systemic Anticancer Therapy (SACT) in all units across England in order to increase safety, to increase efficiency and to support the parity of care across all NHS providers of SACT in England.
IM3: Multi-system Auto-immune Rheumatic Diseases MDT Clinics, Data Collection and Policy Compliance	Specialised Commissioning	Systemic auto-immune rheumatic diseases are rare, multisystem, non-genetic conditions that have high morbidity and mortality. This CQUIN promotes the development of coordinated MDT clinics which will support earlier diagnosis and intervention, and ensure earlier detection/prevention of relapse which will reduce avoidable mortality and morbidity, reduce costs, and improve quality of life.
B12 Haemophilia stock control of factor concentrates at DGH's	Specialised Commissioning	Develop a robust system for stock control of factor concentrates, both those held in stock and those used for in-patients (children and adults) at District General Hospitals (DGH) hospitals. Provision of an education programme for DGH's.
CA3 SACT Optimising Palliative Chemotherapy Decision Making	Specialised Commissioning	CQUIN is being used to incentivise all providers of chemotherapy to review and audit their approach to decision making for specific cohorts of patients, agree an improvement plan and deliver this.
IM2: Cystic Fibrosis Adherence (Adult)	Specialised Commissioning	This scheme employs an electronic Cystic Fibrosis (CF) adherence indicator captured by an IT platform (CFHealthHub) to deliver a complex behavioural intervention that increases patient activation and adherence, thus delivering better patient outcomes and avoidance of costly escalations.
TR3 Spinal surgery: networks, data, Multi-Disciplinary Team (MDT) Oversight	Specialised Commissioning	The scheme aims to promote the better management of spinal surgery by creating and supporting a regional network of a hub centre and partner providers that will ensure data is collected to enable evaluation of practice effectiveness and that elective surgery only takes place following MDT review.
Armed Forces Covenant	Specialised Commissioning	To ensure high quality services are accessible to armed forces personnel and registered families to promote, protect and restore the health of the community.

The 2017/18 National CQUIN programme remains under discussion with our Commissioners.
