29/06/2026

Dear Colleagues,

Re: IgG Tissue Transglutaminase reference range change

I am writing to inform you that from 6th July 2026 there will be a slight change to the IgG Tissue transglutaminase reference range. The lab will be implementing an equivocal range of 17.0-23.9 CU. The implementation of an equivocal range around the manufacturer's cut off value is occurring in response to monitoring of the assay's uncertainty of measurement, as part of our regular review of our assays. A comparison of the old and new ranges for IgG Tissue Transglutaminase is below:

IgG TTG assay	Current ranges	New range
Negative	0 – 19.9 CU	0 – 16.9 CU
Equivocal	None	17.0-23.9 CU
Positive	20.0 CU and above	24.0CU and above

Please contact the lab if you have any questions on Laboratoryimmunology.advice@ouh.nhs.uk

Yours faithfully

Elizabeth
