

Oxford University Hospitals
NHS Foundation Trust

Patient Initiated Follow Up (PIFU) for cancer of the endometrium

If you need to contact the PIFU team, please call:

Clinical nurse specialist 01865 235355

or

Therapeutic radiographer 01865 227213

Please contact us if you experience any of the following:

- Vaginal bleeding or discharge
- Abdominal (tummy) pain
- Pelvic pain
- Unexplained weight loss or loss of appetite
- Persistent changes in bowel habit (new or alternating constipation or diarrhoea)
- Persistent problems when passing urine (infection ruled out by your GP)

Occasional aches or pains or an upset bowel or bladder are unlikely to be related to your cancer, please contact your GP.

We are here to support you if you have any questions or concerns about living with and beyond cancer
