

### **Cover Sheet**

# Trust Board Meeting in Public: Wednesday 12 March 2025

TB2025.27

Title: Board Assurance Framework and Corporate Risk Register

Report

Status: For Discussion

History: Regular report to the Board – last update at Board November

2024

**Board Lead: Deputy Chief Executive** 

Author: Clare Winch, Director of Regulatory Compliance and

**Assurance** 

Confidential: No

Key Purpose: Assurance

### **Executive Summary**

- 1. The purpose of this paper is to provide the Board with assurance on the process to ensure that the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) are kept under active review during the year.
- 2. The Board is asked to review the report against the backdrop of the assurance and risk management processes described in the Risk Management Policy.
- 3. This paper provides the Board with the latest version of the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) for the Board to review.

#### Recommendations

- 4. The Trust Board is asked to:
  - Review and note the report.

# **Board Assurance Framework and Corporate Risk Register Report**

### 1. Purpose

- 1.1. The purpose of this paper is to provide the Board with assurance on the process to ensure that the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) are kept under active review during the year.
- 1.2. The Board is asked to review the report against the backdrop of the assurance and risk management processes described in the Risk Management Policy.
- 1.3. This paper provides the Board with the latest version of the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) for the Committee to review.

#### 2. Board Assurance Framework

- 2.1. The latest version of the BAF is provided as Appendix 1. This has been updated to reflect feedback following its review and discussion at the Risk Committee in January. This has been made available to the Integrated Assurance Committee (IAC) and the Audit Committee in February. The BAF has been updated to record assurance noted through Internal Audit Reports presented to the most recent Audit Committee.
- 2.2. The performance risk score on the BAF was updated to reflect the Trust's move into NHS England Tier 1 scrutiny, and monitoring meetings were added to the governance structures recorded against this risk. All edits since the reporting of the BAF to IAC have been included in red for ease of review.
- 2.3. The current BAF is under review in the context of the work undertaken in relation to the submission of the Trust's 2025/26 plan. This work will include a review to ensure that risks are reflective of the Year 2 objectives and deliverables.
- 2.4. As part of the assurance role of the Audit Committee a review of all agendas and papers from the Board, Audit Committee, IAC, and Investment Committee in 2024/25 to date is undertaken. This review is used to inform the controls and assurance elements of the BAF and assists with the drafting of the Annual Governance Statement. Further detail of this analysis work was provided to the Audit Committee in February. This work will continue to the year end to enable a full look back to be reported to the next Trust Board in May.
- 2.5. This exercise provided assurance to the Audit Committee that all the strategic pillars and risks have been subject to discussion and review, via various Board committees for the year to date.

2.6. The chart in figure 1 shows the current analysis of all reports from April 2024 for the year to date across of each of the strategic pillars.

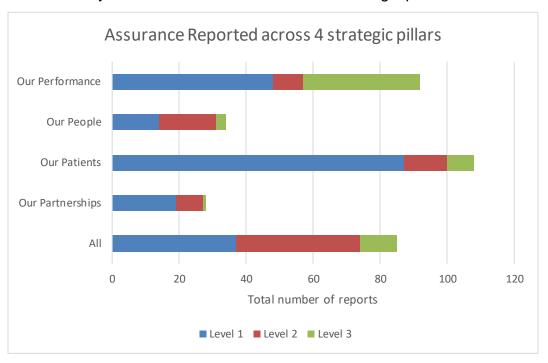

Figure 1

- 2.7. The information in figure two shows the split of current assurance reporting across the Board and board sub-committees by assurance level. With our assurance levels defined as follows:
  - Level 1 Operational (Management) our first line of defence
  - Level 2 Oversight functions (Committees) our second line of defence
  - Level 3 Independent (Audits / Reviews / Inspections etc.) our third line of defence

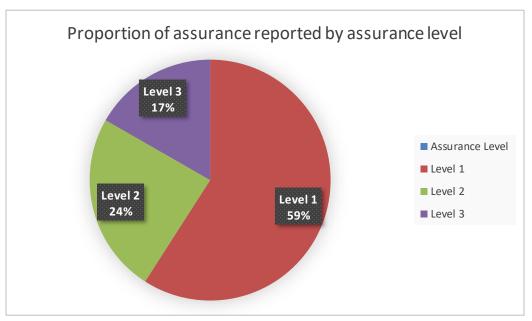

Figure 2

2.8. As would be expected there is a greater proportion of level 1 assurance reported, these are Chief Officer's reports in relation to aspects of delivery against their portfolios of work.

### 3. Corporate Risk Register

- 3.1. The Corporate Risk Register was updated to reflect revisions made by the relevant risk owners and to reflect the review at the Risk Committee in January. This information was reported to the Integrated Assurance Committee and there have been no further formal agreed updates since this review.
- 3.2. The high-level summary of the CRR is provided as Appendix 2 showing the risks by strategic pillar order for information. In addition, it provides a summary sorted by risk score.

### CRR update /Changes

3.3. Changes to the CRR are routinely reported to IAC, Audit Committee and the Risk Committee. The next Risk Committee meeting is scheduled for 13 March 2025. This meeting will be considering the quarter 4 risk scores and risk position. In addition, all risk owners have been asked to consider any revisions in risk description, controls, mitigations and scores in the context of the work undertaken in relation to the submission of the Trust's 2025/26 plan. As highlighted in relation to the review of the BAF this work will include a review to ensure that risks are reflective of the Year 2 objectives and deliverables. Some early proposed changes have been reflected in the detailed CRR that has been provided as a separate document for background information to Board members.

#### 4. Recommendations

- 4.1. The Board is asked to:
  - Review and note the report;

Strategic Objective	To make OUH a great place to work; one that promotes equality, diversity and	
	nclusion, encourages talent and development, and enables freedom to speak up	
	without fear of futility or detriment.	
Strategic Risk 1	Staff may not want to come, not want to stay and not want to engage	

Cause	Risk	Effect
As a result of:  our staff not having a sense of belonging and fulfilment  external factors of cost of living  failure to recruit and retain key staff  Not feeling able to speak up, due to poor inclusive safety culture (inc psychological safety)  Lack of training and development opportunities	there is a risk that staff may not want to come, not want to stay and may not want to engage or be able to develop	<ul> <li>Which could result in</li> <li>Potential loss of high-quality staff, higher turnover / recruitment and retention challenge</li> <li>Lack of support for each other /lack of sense of belonging / not meeting the expectations of our people</li> <li>Higher financial costs</li> <li>Lack of consistency of care / reduction in quality of care</li> <li>Potential harm to patients, staff, and reputation</li> <li>We may not get the most out of our people</li> <li>Poor staff moral / well-being / staff experience</li> <li>Poor employee relations</li> <li>Bullying and harassment</li> <li>Reliance on temporary staffing</li> <li>Staff sickness (potential for increased anxiety etc)</li> <li>Restricted succession planning / career development</li> <li>Potential mistrust, presenteeism</li> </ul>

ID	Score	Summary risk description
1614	12(medium)	Due to national staff shortages there is a risk that we will not be able to recruit and retain
		sufficient numbers of substantive staff to maintain our current level and quality of service (in
		the context of the merging cost of living crisis)
1616	12(medium)	Due to persistent increased workloads there is a risk that sickness absence levels continue to
		rise and that staff will suffer increased levels of mental ill health effecting staff turnover
		levels.
1707	10(medium)	Potential strike action, across nursing, junior doctor and other AHPs (including primary care
		staff), leading to operational performance issues and impact on patient safety and potential
		impact on ED and RTT performance
2443	12(medium)	Risk to implementation of staff Sexual Safety Charter, that might impact staff wellbeing.
2595	15(high)	Ability to meet 700 temp staff reduction target
2596	12(medium)	Impact of temp staff reduction on staff and patients

Priorities marked \* are aligned with the annual planning process and will be included in the OUH submission made to NHSE.

Strategic Objective	To create a <b>culture of continuous improvement</b> in all that we do.	
Strategic Risk 2	Our culture of continuous improvement may not become embedded to deliver	
	sustainable impacts on patient care to ensure highest levels of patient safety,	
	effective outcomes and experience of both patients and our staff	

Cause	Risk	Effect
As a result of:  • high clinical / all workloads, a tired workforce  • strong reliance on discretionary effort to deliver quality improvement training and initiatives,  • failure to educate and empower staff in QI.  • a fear of change / low risk appetite,  • lack of leadership capacity QI  • Inability to effect change (capability and capacity)  • Not able to embed this across all staff groups and all services, corporate and clinical functions.  • Ability to actively engage with research activity.  • Ability to drive patient engagement.  • Changing internal / external agendas  • Ability to invest in QI resources for improvement.  • Insufficient resources in continuous improvement	there is a risk that a culture of continuous improvement may not become embedded, hindering the adoption of improvements and best practice, leading to patient harm and leaving staff disempowered with low morale	<ul> <li>which could result in</li> <li>poor patient outcomes – more harm</li> <li>poor quality, efficiency, productivity, waste and poor financial performance placing increased pressure on services and staff that might lower engagement and morale.</li> <li>Service improvement opportunities not taken forward / less novel emerging therapies/ lower ability to deliver new treatment options</li> <li>Sustainability of continuous improvements</li> <li>Impact on staff may not feel empowered to make improvements</li> <li>Increased mortality</li> <li>Impact on reputation</li> </ul>

ID	Score	Summary risk description
85	15 (high)	MRC - Managing medical patients in outlier wards - there is a risk of harm to patients and
		increased length of stay (Note escalated to CRR Q1 24/25)
67	16 (high)	SWON OR 0004 - Limited ICU capacity - due to staffing and space issues there is a
		potential risk that ICU demand may outstrip current capacity
3	16 (high)	Vulnerability of the Bedford computer system (CSSD 1415-09)

Strategic objective	To consistently achieve all operational performance standards and financial sustainability.
Strategic Risk 3.1	We may not operate effectively, and may not be able to deliver performance
	standards sustainably, patient care will suffer and we will face regulatory
	enforcement.

Cause	Risk	Effect
As a result of  Our ability to participate in ICS / APC  ICS effectiveness / failure of ICS policy framework / ICB boundaries  Wider landscape changes inyear/ short termism in NHS  National / regional restructure  Ageing population with multiple co-morbidities  Industrial action  Changes to Specialist commissioning  National planning guidance  Availability of workforce / loss of experience staff aging workforce  Poor theatre utilisation  Poor estate  Lack of capital development  Lack of mutual aid / funding	there is a risk that we may not operate effectively, and may not be able to deliver sustainable performance standards	<ul> <li> which could result in</li> <li>Ability to plan over time,</li> <li>Not having the right people of the right quality / different capacity (human and physical)</li> <li>Strategic planning in the broader sense</li> <li>Inability to deliver Cancer and other standards</li> <li>Additional oversight from ICB, regional and national team – system oversight process</li> <li>Increased use of temporary staffing</li> <li>Poor access times / longer waits for patients leading to harm</li> <li>Poor productivity</li> </ul>

Assurance on ED staffing business case to come to IAC October 24	<ul> <li>Delivery of 24/25 planned service developments, in accordance with three-year plan.</li> <li>Establish planned 24/25 KPIs and dashboards in accordance with three-year plan.</li> <li>Deliver planned measures to mee NHSE operational requirements in accordance with 24/25 actions in the three-year plan.</li> </ul>		

ID	Score	Summary risk description
1133	15 (high)	Ability to improve ED waiting times (a minimum of 78% of patients seen within 4 hours by March 2025) potential risk to operational performance impacting on patient experience and
		outcomes
1135	15 (high)	Bed capacity, staffing and ERF funding/ support poses a risk to meeting the elective care
		delivery plan that might affect patient outcomes and experience (Note summary description
		updated in line with 24/25 delivery plan)
1136	16 (high)	Due to issues with diagnostic capacity there is a risk to our ability to reduce the current
		backlog of patients waiting for elective care and cancer diagnosis and treatment this might
		effect patients in terms of harm or poor outcomes (Note summary description updated in
		line with 24/25 delivery plan)
2445	15 (high)	Ability to meet delivery plan trajectories for the achievement of Cancer targets that might
		impact on patient outcomes (Note new risk added in line with 24/25 delivery plan)
67	16 (High)	SWON OR 0004 - Limited ICU capacity - due to staffing and space issues there is a potential
		risk that ICU demand may outstrip current capacity (Note escalated to CRR Q1 24/25)

Strategic objective	To consistently achieve all operational performance standards and financial sustainability.
Strategic Risk 3.2	We may not operate effectively, and our finances may become unsustainable over the short and longer term

Cause	Risk	Effect
As a result of  Our ability to participate in ICS.  ICS effectiveness / failure of ICS policy framework / ICB boundaries  Wider landscape changes inyear/ short termism in NHS  Unsustainable financial model  Approach to NHS capital budget  Specialist commission landscape changes  National planning guidance  Lack of grip  Poor control of pay and non-pay budgets  Lack of delivery of productivity goals	there is a risk that we may not operate effectively, and our finances may become unsustainable over the short and longer term	<ul> <li>which could result in</li> <li>Lack of ability to fund emerging therapies/ new treatment options.</li> <li>Support financially or for our people skills provision to be delivered in a different way</li> <li>Ability to plan over time, new investments.</li> <li>Additional oversight from ICB, regional and national team – system oversight process</li> <li>Increased use of temporary staffing</li> <li>Poor patient care</li> <li>Poor staff morale</li> <li>Increased pressure on cash potentially leading to need to cut services</li> </ul>

# Oxford University Hospitals Trust: Appendix 1: Corporate Risk Register Summary

ID	Score	Summary risk description
1115	6 (low)	As a result of a mix of paper and IT record systems there is a risk of increased patient safety
		incidents that may effect patient care.
1398	10 (Medium)	Unsupported Hardware or Software fails and cannot be recovered; causes cyber security
		vulnerability; or becomes incompatible with supported systems ('technical debt'
		management).

Strategic Objective	To have an estate that meets the highest levels of regulatory compliance and	
	enhances our offer for patient care and staff wellbeing by adopting novel ideas and	
	methods that embrace the sustainability goals.	
Strategic Risk 5	If we fail to plan, deliver and maintain our estates infrastructure then we will be	
	unable to meet regulatory standards and be unable to maintain safe infrastructure to	
	support patient care and staff wellbeing.	

Cause	Risk	Effect
As a result of  The NHS financial regime  If the trust does not develop and enhance clinical demand and capacity plans to identify a medium/	Riskthere is a risk that we may not be able to plan deliver and maintain estates infrastructure to keep services functioning, meet statutory compliance regulations and provide	which could result in  The trusts' ability to run its services efficiently and effectively in the right place with the right provision at the right time in modern and fit for purpose healthcare facilities.  Future site development plans may not be fit for purpose  Less ability to ascertain NHS capital or alternative financial support for the future development of our sites
long-term site development control plan and strategy  If the trust's estates infrastructure and environment is not improved	enhancements / improvements for patient care and staff wellbeing.	<ul> <li>Infrastructure problems</li> <li>Business continuity problems</li> <li>Estate compliance infrastructure / Regulatory Compliance issues</li> <li>Loss of services and productivity</li> <li>Impact on environment for patients and staff</li> <li>Poor staff experience</li> <li>Poor patient care</li> </ul>

ID	Score	Summary risk description
1124	12	As a result of Insufficient capital funding to cover all major capital schemes there is a risk that
	(medium)	certain services are delivered in poorer estate for a longer period this may effect service
		delivery
1125	12	Significant backlog maintenance program means there is a risk that certain areas of the
	(medium)	estate may be likely to breakdown this might lead to poor estates compliance
1128	12	Due to aging power plant there is a risk of loss of electrical power across JR and NOC sites
	(medium)	resulting in potential of major loss of clinical services.
1129	12	Due to poor fabric on the building in certain locations there is a risk of potential slips, trips
	(medium)	and falls and to staff and visitors in old parts of the Churchill effecting patient and public
		safety
1130	12	As ventilation plant is old in some locations there is a risk to patient and staff safety that may
	(medium)	effect regulatory compliance
1131	12	As a result of actions identified via audits and poor fabric of the estates there is a risk to
	(medium)	patient and staff safety from the water systems in certain buildings effecting the trust
		reputation.

Strategic objective	To work in <b>partnership</b> at Place and System level for the benefit of our patients and populations with effective collaboration to <b>reduce health inequalities</b> and fulfil our role as an <b>anchor institution</b> .
Strategic Risk 6	We may not be able to deliver reductions in health inequalities and the anticipated benefits of anchor institution

Cause	Risk	Effect
As a result of:  Our ability to participate in ICS.  ICS effectiveness / failure of ICS policy framework  Wider landscape changes in-year/short termism in NHS  Inability to collaborate  Difficulty in maintaining relationships with University partners	There is a risk that we may not be able to deliver reductions in health inequalities and the anticipated benefits of anchor institution. There is a risk of not delivering research and innovation outcomes for the benefit of our patients	which could result in:  Less novel emerging therapies/ lower ability to deliver new treatment options.  Not having the right people of the right quality / different capacity (human and physical)  Lack of consistency of care / reduction in quality of care  Potential harm to patients, staff, and reputation

ID	Score	Summary risk description
1142	12(medium)	Due to introduction of new ICS governance arrangements and other national factors (such as
		change in government policy) there is a risk to service delivery that might effect patient
		outcomes (note proposed increase score for Q2 due to ICB restructuring proposals)
1111	9 (medium)	Due to lack of capacity and ineffective working practices across the system there is a risk
		that patients might not receive the right care in the place at the right time which may effect
		patient outcomes, experience and staff morale.

Sorted by current risk score (highest risk first)

	by current risk score (highest risk first)		ı	
Risk ID	Title Title	Q3	Target	pillar
1153	Failure to effectively control pay and non-pay costs resulting in overspends against budget and inability to achieve financial targets	20	8	performance
1119	As a result of productivity levels that are insufficient to cover costs based national average funding levels there is a risk that there may be an inability to breakeven over 3-5 years that might effect the Trust's ability to sustain safe, compliant and effective provision of healthcare.	20	12	performance
67	SWON OR 0004 - Limited ICU capacity - due to staffing and space issues there is a potential risk that ICU demand may outstrip current capacity	16	4	patient
3	Vulnerability of the Bedford computer system (CSSD 1415-09)	16	4	patient
1157	Failure to deliver in year Financial Plan (Cash Impact) Decreasing liquidity ratio leads to: Increased regulatory reporting and potential delays in paying suppliers	16	4	performance
1135	Bed capacity, staffing and ERF funding/ support poses a risk to meeting the elective care delivery plan that might affect patient outcomes and experience	16	9	performance
1136	Due to issues with diagnostic capacity there is a risk to our ability to reduce the current backlog of patients waiting for elective care and cancer diagnosis and treatment this might effect patients in terms of harm or poor outcomes	16	6	performance
85	MRC - Managing medical patients in outlier wards - there is a risk of harm to patients and increased length of stay	15	6	patient
2595	Ability to meet 700 temp staff reduction target	15	6	people
1133	Ability to improve ED waiting times (a minimum of 78% of patients seen within 4 hours by March 2025) potential risk to operational performance impacting on patient experience and outcomes	15	9	performance
1128	Due to aging power plant there is a risk of loss of electrical power across JR and NOC sites resulting in potential of major loss of clinical services.	12	4	patient
1130	As ventilation plant is old in some locations there is a risk to patient and staff safety that may effect regulatory compliance	12	8	patient
1131	As a result of actions identified via audits and poor fabric of the estates there is a risk to patient and staff safety from the water systems in certain buildings effecting the trust reputation.	12	8	patient
1614	Due to national staff shortages there is a risk that we will not be able to recruit and retain sufficient numbers of substantive staff to maintain our current level and quality of service (in the context of the merging cost of living crisis)	12	9	people
2596	Impact of temp staff reduction on staff and patients	12	4	people
1616	Due to persistent increased workloads there is a risk that sickness absence levels continue to rise and that staff will suffer increased levels of mental ill health effecting staff turnover levels.	12	9	people
2443	Risk to implementation of staff Sexual Safety Charter, that might impact staff wellbeing	12	6	people
1124	Insufficient capital funding / inability to spend current capital to cover all major capital schemes means that there is a risk that certain services are delivered in poorer estate for a longer period this may effect service delivery	12	8	performance
1125	Significant backlog maintenance program means there is a risk that certain areas of the estate may be likely to breakdown this might lead to poor estates compliance	12	8	performance
2445	Ability to meet delivery plan trajectories for the achievement of Cancer targets that might impact on patient outcomes	12	8	performance
1707	Potential strike action, across nursing, junior doctor and other AHPs (including primary care staff), leading to operational performance issues and impact on patient safety and potential impact on ED and RTT performance	10	5	people
1398	Unsupported Hardware or Software fails and cannot be recovered; causes cyber security vulnerability; or becomes incompatible with supported systems ('technical debt' management).	10	8	performance
1114	Due to inconsistencies in the processes and behaviours there is a risk that there may be a failure to respond to the results of diagnostic tests that may affect patient care	9	4	patient
1121	As a result of poor medicine safety audits and the lack of ability to progress actions there is a risk that medicines may not be stored securely and safely and in line with regulatory requirements that might effect standards are care.	9	3	patient
1141	If there are poor controls over the administration of medical air as opposed to oxygen there is a risk of increased incidents effecting patient safety	9	6	patient
1138	Due to the amount of changes in relation to major capital projects there is a risk of potential impacts on service delivery that might effect patient care	9	3	performance
1111	Due to lack of capacity and ineffective working practices across the system there is a risk that patients might not receive the right care in the place at the right time which may effect patient outcomes, experience and staff morale.	9	6	partner
1142	Due to the introduction of new ICS arrangements and other national factors (such as change in government policy) there is a risk in relation to lost opportunities to service delivery that might effect patient outcomes	9	3	partner
1129	Due to poor fabric of the building in certain locations there is a risk of potential slips, trips and falls and to staff and visitors in old parts of the Churchill effecting patient and public safety	8	8	patient
1115	As a result of a mix of paper and IT record systems there is a risk of increased patient safety incidents that may effect patient care.	6	3	patient
1112	Due to the lack of capacity and resources available for QI there is a risk to the delivery of internal trust quality improvements and to influence system-wide quality improvement effecting the learning and improvement culture across the ICS	6	6	partner
1150	If the trust is not able to increase the portfolio of research activity (and innovation activity) to pre covid levels the is a risk to delivery of research activity that might effect reputation/finance	4	2	partner
