Do's and Don'ts

1. Do sit up straight. (Imagine you have a long neck like a giraffe touching the roof.) Your nose should be at least a ruler length away from your desk.

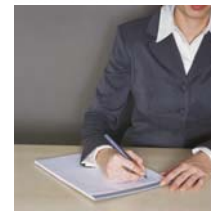

2. Do put your feet on the floor.

Put at phonebook or file under your feet if they can't reach the floor.

3. Do have your paper at a comfortable angle, in line with your forearm.

4. Do move your paper up as you fill the page.

5. Do hold your pencil between your thumb, index and middle finger. Remember the 'froggy' needs a pool.

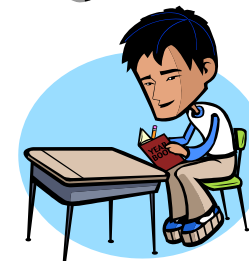

6. Don't grip your pen so that your hand aches. A thicker pen or special grip may help with this.

7. Don't have your table and chair too big or too small.

You want approximately 90° at your ankles, knees and hips and your table needs to be just above your elbow height when sitting with your arms at your sides.

This chair and table is far too low!

8. Don't have a shadow over your work and make sure there is enough light.

9. Don't have your elbows touching your neighbours.

Teachers note: Think about how you position a left and right handed child next to each other.
